**The Coins of Herod** Donald Tzvi Ariel, Jean-Philippe Fontanille, 2011-12-30 Herod, ruler of Judea at a pivotal time (40-4 BCE) in the region's history, was Rome's most famous client king. In this volume, Herod's coinage benefits from a comprehensive reappraisal. The coins and dies have been thoroughly examined, resulting in innovative iconographic and technological interpretations. Study of the coins' presence in hoards, their archaeological contexts and geographical distribution, together with other typological, epigraphic and numismatic observations, have aided in establishing that all of the types were minted in Jerusalem. A new relative chronology of Herod's dated and undated coins is the most important by-product of this study. Finally, an attempt is made to peg this seriation to known events within the king's reign.

*The Coins and Banknotes of Palestine Under the British Mandate, 1927-1947* Howard M. Berlin,2015-09-01 From 1923 until May 1948, Palestine was under a British Mandate. Beginning in 1927, on the Eve of the tenth anniversary of the Balfour Declaration, Palestine began producing its own money. The coins and banknotes that were legal tender during these two decades are especially interesting both to collectors and historians. A brief history of Palestine up to 1948 and information on the Palestine Currency Board provide background information. Complete numismatic information is then presented for each coin and banknote. Also covered are the mysterious 1927 Holyland Token, counterfeit issues, and vignettes of the religious sites featured on banknotes. Appendices present the text of the British Mandate for Palestine, catalog numbering systems for Palestine coins and banknotes, and a checklist for collectors. (The text does not introduce a new numbering system.) Color and black and white illustrations bring these beautiful pieces of currency, many now rarities, to life.

on Lake Kinneret, a place of production and trade, of supply for military forces, certainly in contact with other trading centres, probably located on the Mediterranean coast, however in a 'market' perspective quite different from our current experience and even from the semantic content of this word, often abused with a semantic extension that does not correspond to the experience of the ancients. Its monetary decline started on the early 4th century, when the economic and monetary strategies of the Constantinian era shifted the flow of money to other routes, especially between the great port cities of the Mediterranean. The welcome contribution of Callegher's study derives from the new data published, which allows us to overcome clichés and a stereotypical view of both the archaeological site and the economy of the Upper Galilee.
