Poverty Row HORRORS! Tom Weaver, 1993-01-01 Poverty row horror films were usually inexpensively (some would say cheaply) produced with writing that ranged from bad to atrocious. Yet these movies with their all-star horror casts (Carradine, Lugosi, Karloff, et al.) and their ape men, mad monsters, devil bats and white zombies still have a loyal audience 50 years after their release. Essays contain full filmographic data on the 31 horror chillers made by the three studios from 1940 through 1946 and are arranged by year of release. Each entry includes the date of release, length, production credits, cast credits, interview quotes, and a plot synopsis with critical commentary. Filmographies for prominent horror actors and actresses, from John Abbott to George Zucco, are provided in the appendices.

Death's End Cixin Liu, 2016-09-20 Read the award-winning, critically acclaimed, multi-million-copy-selling science-fiction phenomenon - soon to be a Netflix Original Series from the creators of Game of Thrones. Half a century after the Doomsday Battle, the uneasy balance of Dark Forest Deterrence keeps the Trisolaran invaders at bay. Earth enjoys unprecedented prosperity due to the infusion of Trisolaran knowledge and, with human science advancing and the Trisolarians adopting Earth culture, it seems that the two civilizations can co-exist peacefully as equals without the terrible threat of mutually assured annihilation. But peace has made humanity complacent. Cheng Xin, an aerospace engineer from the 21st century, awakens from hibernation in this new age. She brings knowledge of a long-forgotten program dating from the start of the Trisolar Crisis, and her presence may upset the delicate balance between two worlds. Will humanity reach for the stars or die

Synthesis of Subsonic Airplane Design E. Torenbeek,2013-06-29 Since the education of aeronautical engineers at Delft University of Technology started in 1940 under the inspiring leadership of Professor H.J. van der Maas, much emphasis has been placed on the design of aircraft as part of the student's curriculum. Not only is aircraft design an optional subject for thesis work, but every aeronautical student has to carry out a preliminary airplane design in the course of his study. The main purpose of this preliminary design work is to enable the student to synthesize the knowledge obtained separately in courses on aerodynamics, aircraft performances, stability and control, aircraft structures, etc. The student's exercises in preliminary design have been directed through the years by a number of staff members of the Department of Aerospace Engineering in Delft. The author of this book, Mr. E. Torenbeek, has made a large contribution to this part of the study programme for many years. Not only has he acquired vast experience in teaching airplane design at university level, but he has also been deeply involved in design-oriented research, e.g. developing rational design methods and systematizing design information. I am very pleased that this wealth of experience, methods and data is now presented in this book.

Short Brothers Philip Macdougall,2019-08-22 Short Brothers was established in 1908, the first British aircraft manufacturer, with the company moving to Rochester during the early years of the First World War. At Rochester Shorts produced some of their most famous aircraft, beginning with a number of designs for the Royal Naval Air Service. During the

inter-war years the company specialised in large flying boats, these undertaking pioneering flights while establishing a series of regular over water air routes operated by Imperial Airways. At Rochester the Company designed and manufactured the Stirling bomber and Sunderland flying boat. Short Brothers: the Rochester Years not only looks at the development of those aircraft, but is a fascinating account of the early years of long-distance aviation and the airmen that used the River Medway at Rochester as a launch pad for flights of hitherto undreamed of distances.

Assessing the potential for civil-military integration : selected case studies. ,1995 The Office of Technology Assessment, at the request of the Congress, has conducted a series of assessments of the Nation's ability to provide for its future national security technology and industrial needs. In the most recent report, Assessing the potential for Civil- Military Integration, OTA examined the potential for making greater use of common technologies, processes, labor, equipment, material, and/or facilities to meet both defense and commercial needs. This effort, often termed civil-military integration or CMI, is believed by many observers to be an essential element of a successful U.S. national security strategy. OTA's assessment found that greater CMI is possible, and confirmed the potential for cost savings and increased technology transfer as the result of increased integration. The assessment noted that CMI appears essential if defense is to take advantage of many rapidly developing commercial technologies.

From the bestselling author of Rich and Pretty comes a suspenseful and provocative novel keenly attuned to the complexities of parenthood, race, and class. Leave the World Behind explores how our closest bonds are reshaped—and unexpected new ones are forged—in moments of crisis. Amanda and Clay head out to a remote corner of Long Island expecting a vacation: a quiet reprieve from life in New York City, quality time with their teenage son and daughter, and a taste of the good life in the luxurious home they've rented for the week. But a late-night knock on the door breaks the spell. Ruth and G. H. are an older couple—it's their house, and they've arrived in a panic. They bring the news that a sudden blackout has swept the city. But in this rural area—with the TV and internet now down, and no cell phone service—it's hard

to know what to believe. Should Amanda and Clay trust this couple—and vice versa? What happened back in New York? Is the vacation home, isolated from civilization, a truly safe place for their families? And are they safe from one other?
